The implementation of FIRM would result in significant cost savings and efficiency improvements by standardizing and integrating administrative and accounting systems throughout the Department. This increase would be offset by reductions in other Department activities.

DEPARTMENT OF DEFENSE-CIVIL

CORPS OF ENGINEERS-CIVIL

1988 Budget Appendix Page	Heading	1988 Budget Request Pending	1988 Proposed Amendment	1988 Revised Request
I-H4	Operation and maintenance, general	$1,465,636,000	-$60,000,000	$1,405,636,000
I-H5	General regulatory functions	---	60,000,000	60,000,000
	(Insert the above heading and the following appropriation language immediately after the material under the heading "Operation and maintenance, general":)			
	For expenses necessary for general regulatory functions, $60,000,000 to remain available until expended.			

This proposal would provide for the transfer of funding for regulatory functions of the Army Corps of Engineers-Civil from the Operation and maintenance, general budget account to a new budget account entitled General regulatory functions. This technical adjustment reflects recent Congressional action on the Corps fiscal year 1988 appropriations request. This proposal also reflects a $5,000,000 increase (from $55,000,000 to $60,000,000) for Corps regulatory functions. This increase is required because of regulatory workload increases. This proposal is offset by a $60,000,000 reduction in the request for appropriations for the Operation and maintenance, general account.
